- Growth, S'pore SME500 and FG50, **3 years CAGR 68%**

Proposed Project : **EaseSync**

- **Automate Scheduling through Synchronization to Mobile Phone**
 - **Objective:**
 - Improve productivity of workforce through centralized, server-based synchronization of scheduling applications and mobile phones through *EaseSync*.
 - **Benefits:**
 - Hospitals need only to manage a central scheduling system which can be updated directly to mobile phones. Healthcare professionals can spend more time with patients instead of worrying about updated shift schedules.
 - SyncML is the leading open industry standard for universal synchronization of remote data and personal information across multiple networks, platforms and devices. This feature is already available in most brands of mobile phones.
 - No computer is needed for this form of synchronization.
 - **Collaboration**
 - Healthcare solution providers
