- IT Security Managed Services
- Business Process Management

CareLINE Suite of Healthcare Solutions

- **Emergency Department System** is an intuitive and user-friendly clinical dashboard and medical records system offering both patients and healthcare providers a hassle-free experience through improved efficiency. It is installed in Alexandra Hospital and since then had helped cut waiting time by 1 hour for end to end treatment through the improved efficiency.
- **Clinic Management System** is a web-based management system where specialists and doctors benefit from its user friendliness and improved efficiency leading to more streamlined work processes and related cost savings arising from them. It was selected by IDA and MOH as a CMS solution for the Chronic Disease Management Programme.
- **InfoBroker (IB)** is the heart of CareLINE, integrating all health information, rules, workflow and processes. IB allows Healthcare Service Providers (HSPs) to seamlessly integrate with healthcare systems through proven industry standards adaptors such as HL7. IB lets HSPs extend and protect their current investment on their existing or new healthcare systems.
