

Leveraging Open Source Technology for Business Competitive Advantage

**Edwin Chua - echua@redhat.com
Regional Business Manager, ASEAN**

Open Source/Red Hat provides CHOICE

[CHOICE]

Open Source: The Future is Wide Open

- By 2011, Gartner predicts that at least 80% of all commercial software solutions will be based on open source
- Gartner surveys show 49.7% of open source used for mission-critical applications

IGNORING OPEN SOURCE IS NO LONGER AN OPTION

“Open source is the biggest change in corporate IT since distributed computing. It is not a niche, not a fad. Competing against open source is like tilting at windmills.”

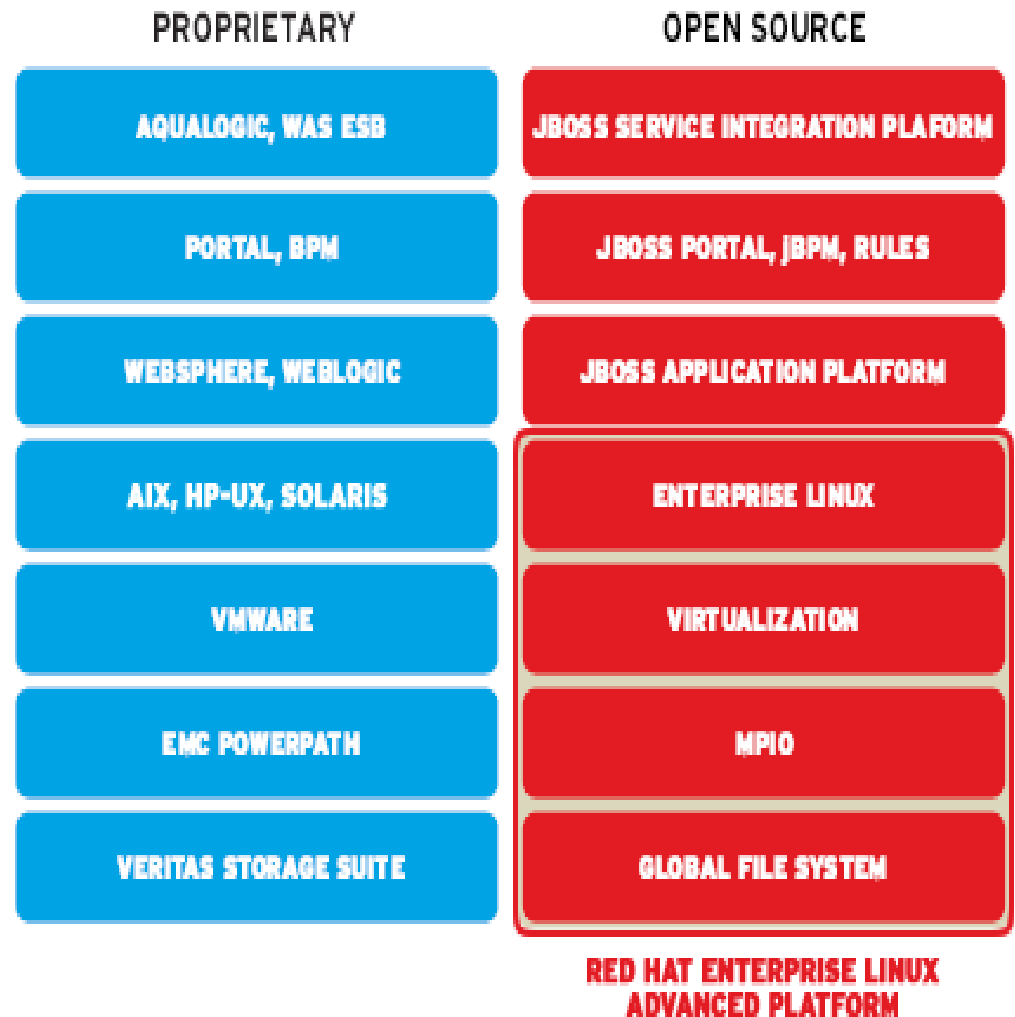

- Gartner Open Source Summit, September 2007

Our Mission

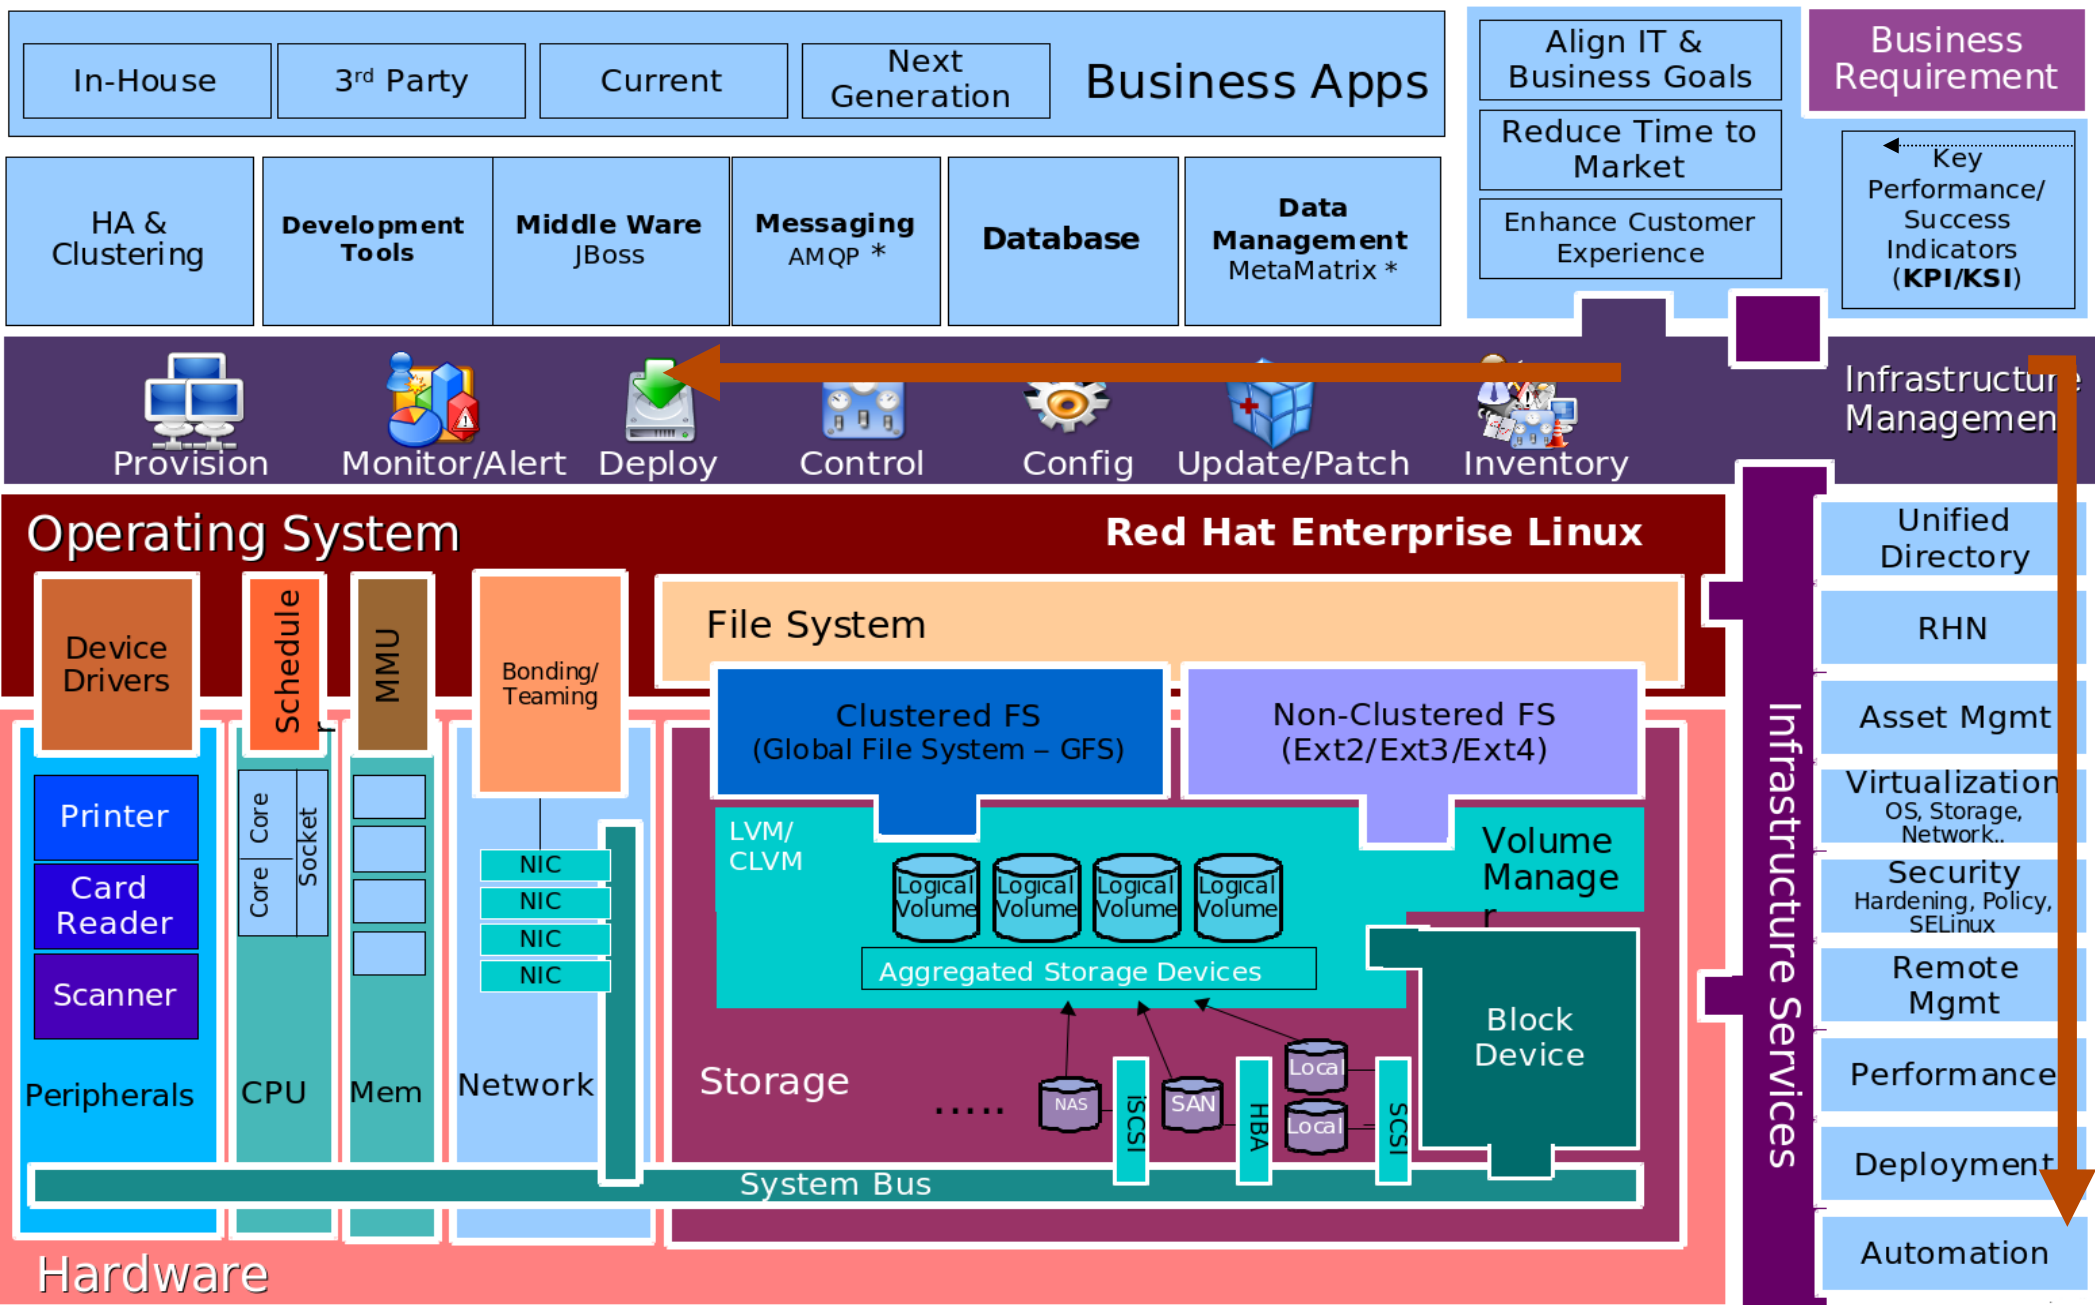

*To be the **defining** technology company of the 21st century; and through our actions strengthen the social fabric by continually **democratizing** content and **technology**.*

Red Hat helps close the GAP

- Transforming your business when you need it
- Based on open standards
- Convert CAPEX to OPEX based on Subscription Model
- Choice of redeployment of resources to power growth
- Technology excellence in Red Hat Enterprise Linux (RHEL) and JBoss

Red Hat Vision: The Big Picture

* Available later in 2007
