services and  
outsourcing

Global network  
services &  
solutions

### Supported by

Outsourcing, ASP, e-commerce, e-business ...

A focus on security services

And service excellence

# Why SITA?

- **SITA is the only global organisation in air transportation that provides both network services, the IT infrastructure and IT applications to cover every aspect of airline and airport operations**
- **SITA operates one of the most complex mobile communications networks in the world**
- **SITA is the only company providing aviation solutions that provide a fully managed, end-to-end service for the entire passenger journey: from booking to check-in, to flight operations, to in-flight services up to arrival at the final destination**
- **SITA is industry neutral and spearheads the definition of IT standards for the air transport industry**
- **SITA is the glue that holds the global air transport industry together**

# With SITA...

**Joining expertise to synergise solutions including:**

- ICAO and other industry associates
- Biometrics hardware and software providers
- Hardware vendors to provide the equipment

**Partnering to reinforce strength for development:**

- Civil Aviation Authority of Singapore
- Immigration and Checkpoints Authority
- Singapore Police Force

**Thank you!**
