

**Services Enablement through
Nucleus Connect's
Interoperability Test (IOT) Centre**

25 November 2009

Delivering services on Next Gen NBN

- Thinking of how to deliver services over the Next Gen NBN?

What is the IOT Centre?

-  A platform where RSPs can test end-to-end delivery of services over the Next Gen NBN

-  To support RSPs in testing and validating their innovative services.

IOT Centre facilities

- IOT Centre – replica of Nucleus Connect's active network
- Equipped with up-to-date hardware & software
- Located at Nucleus Connect's Central Office 1 at Tai Seng Drive

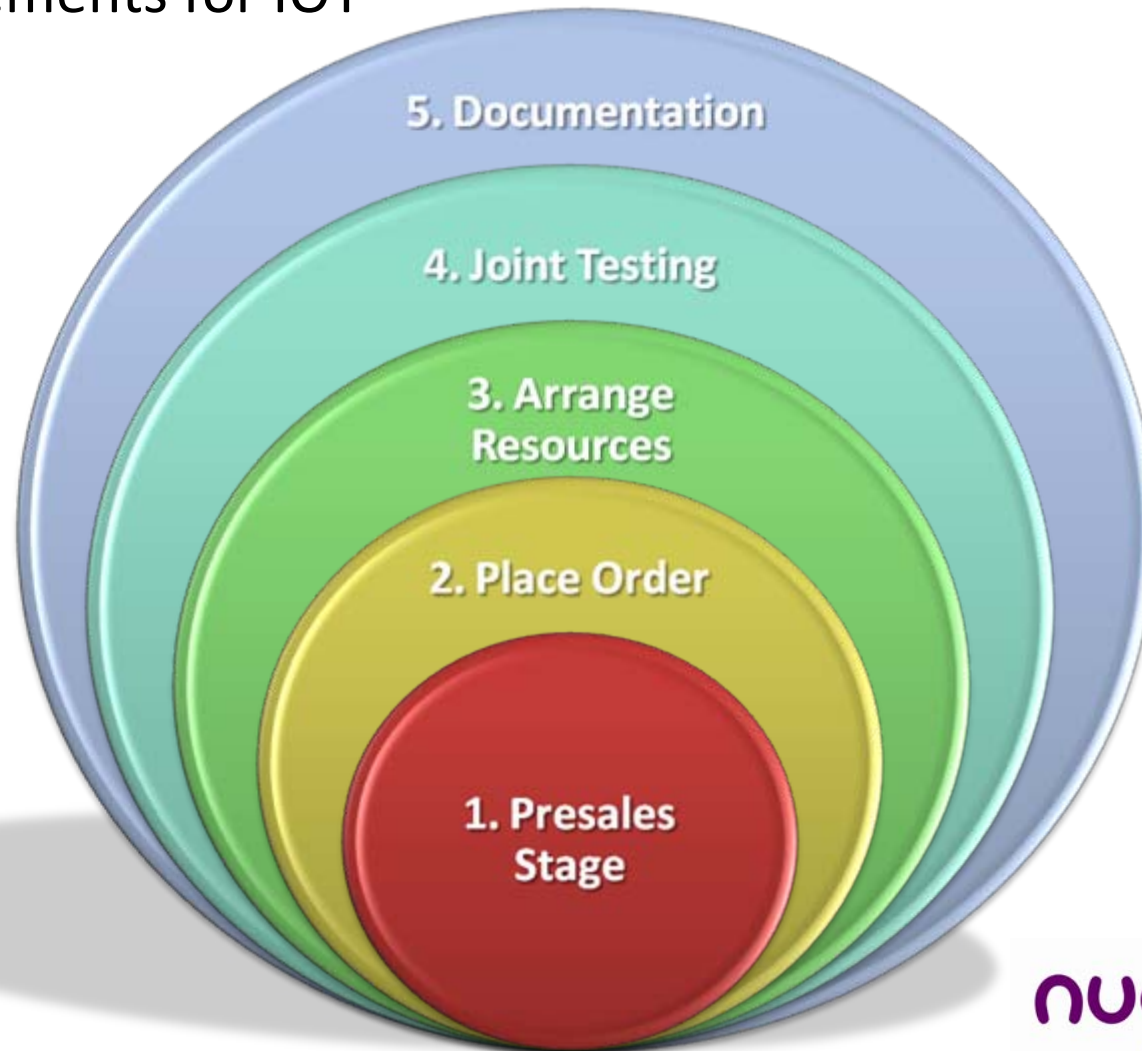

- Rack space for housing RSP equipment during IOT
- Discussion rooms/work space
- Qualified and experienced engineers on hand to provide assistance

- Verification of interoperability between RSP's network equipment and NC network
- Verification of bandwidth, QoS, protocol settings to provide desired customer experience to end users

- Connectivity Tests
- Throughput & End-to-End Performance Testing
- Failover Mechanism & Protocol test
- Service Functionality test

Embarking on IOT

- Nucleus Connect will work closely with RSP on its requirements for IOT
