1. Introduction

These are views and comments from Sumitomo Electric Networks on Industry Dialogue on Outcome – Based Approach document, released on 16 September, 2010

2. Views and Comments

5.2 Multi-RSP Support

We strongly recommend to adopt the existing mature international standard: ITU-T H.770 "Provider and Service Discovery". If it is necessary, we recommend Singapore local industrial SDO to discuss and determine the "Singapore Profile" for MultiRSP support based on ITU-T H.770.

5.3 Common Applications and Services Environment

Common Applications and Services Environment for NIMS CF-STB shall include highly stable firmware download and update functionality for STB that has enough market experiences.
